

How to Change your Password

Overview

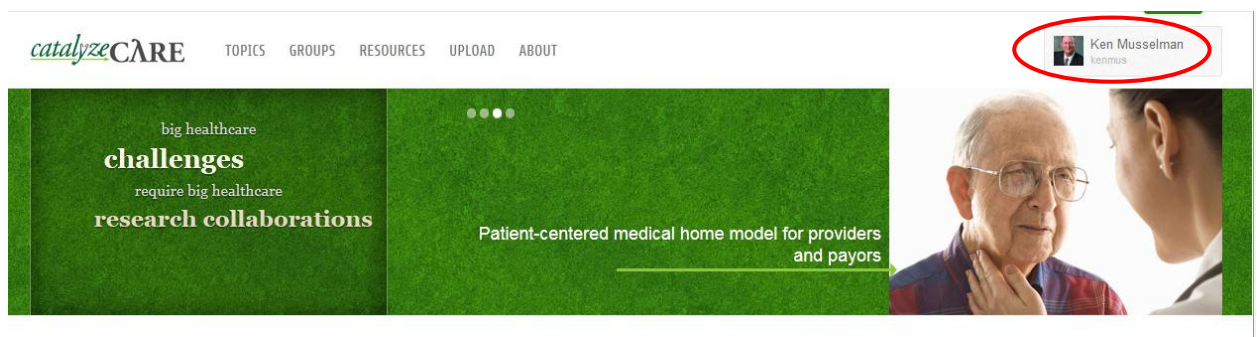

This document provides general information about how to change your password in CatalyzeCare.org, a hub for healthcare research and educational activities.

Changing your Password

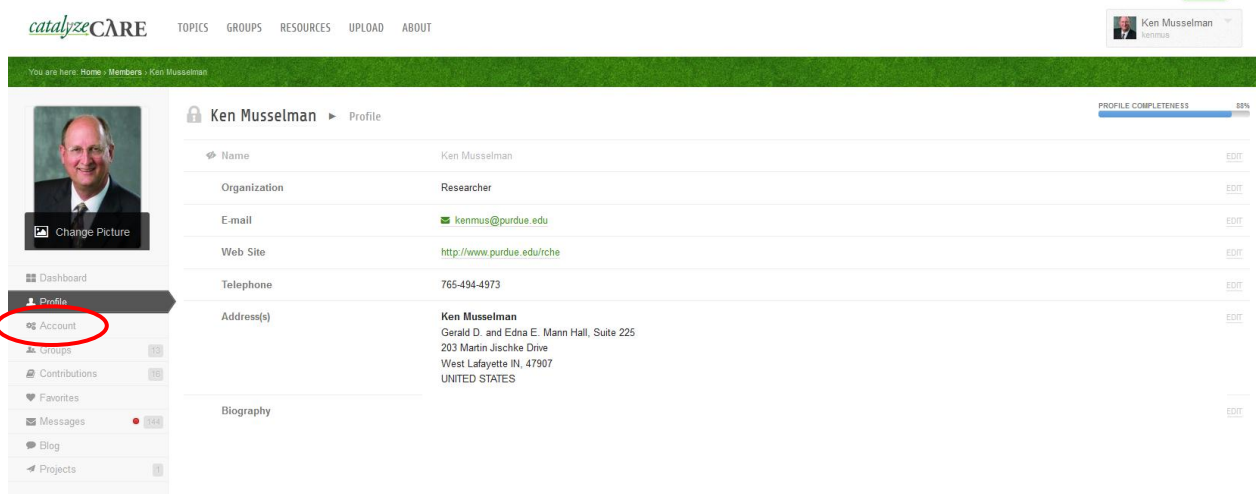

CatalyzeCare does not prompt you to change your password. However, upon first entering the hub, please change your password to better conform to your own naming convention.

To change your password, do the following.

1. In the upper right-hand corner of the home page, your name is displayed. When you pass your cursor over it, a list of options appears. Click on "PROFILE."

2. When your profile comes up, click on "Account."

3. Here you are given the opportunity to change your password. Once done, click “Save.”

The screenshot displays the CatalyzeCARE website interface. At the top left is the logo 'catalyzeCARE' with navigation links for TOPICS, GROUPS, RESOURCES, UPLOAD, and ABOUT. A user profile box in the top right shows 'Ken Musselman' with a small profile picture. Below the navigation is a green breadcrumb trail: 'You are here: Home > Members > Ken Musselman'. The main content area features a user profile for 'Ken Musselman' with a larger profile picture and a 'Account' link. A 'Change password' modal form is open, containing three input fields: 'Current password', 'New password', and 'Confirm new password'. At the bottom of the form are 'Save' and 'Cancel' buttons. A left-hand sidebar menu includes links for Dashboard, Profile, Account (highlighted), Groups, Contributions, Favorites, Messages (with a notification badge), Blog, and Projects.

Should you have any questions regarding changing your password, please do not hesitate to contact the CatalyzeCare webmaster at ccare@purdue.edu.
